

BRAIDED LINE SERVICES

Ranger Energy Services in the Permian Basin proudly offers state-of-the-art Braided Line Services, leveraging the robustness of a 1/4" braided line for superior interventions in demanding downhole environments.

Our suite of services encompasses expert Horizontal and Vertical Fishing for the retrieval of lost tools, specialized Tubing and Casing Fishing to address obstructions, and meticulous Pulling of RBPs. We also excel in Setting and Pulling Tubing Plugs, Broaching for obstruction removal, and precise Chiseling of Preset Plugs in casings. Our Gauge Ring Runs ensure optimal tubing and casing integrity, supported by advanced 3" 5K and 5-1/2" 10K Pressure Control Equipment. To complement our wireline operations, we deploy a 50t Crane, ensuring comprehensive service delivery for our esteemed clientele.

RANGER LEADS THE WAY

SERVICES

Horizontal and Vertical Fishing

Expert retrieval techniques to recover lost or stuck equipment in both horizontal and vertical wellbore orientations.

Tubing and Casing Fishing Services

Specialized retrieval services aimed at extracting obstructions or misplaced tools from within well tubing or casing.

Pulling RBP's

A focused service for safely removing Retrievable Bridge Plugs, crucial for zone isolation during well operations.

Setting and Pulling Tubing Plugs

Efficient processes to place and retrieve tubing plugs, essential for controlling and isolating specific well zones.

Broaching

A service dedicated to clearing obstructions within tubing, ensuring consistent well operations and unobstructed flow.

Chisel Out Preset Plugs in Casing

Precise removal of preset plugs from casing, essential for maintaining well integrity and operational flow.

Gauge Ring Run in Tubing and Casing

A diagnostic procedure to confirm the internal dimensions and integrity of tubing and casing, ensuring they meet operational standards.

3" 5K, 5-1/2" 10K Pressure Control Equipment

Advanced equipment designed to maintain and regulate pressure in challenging well environments, available in two specifications for versatile application.

50t Crane

Heavy-lifting equipment support, ensuring seamless and efficient operations at the wellsite.

WHY CHOOSE RANGER WIRELINE?

- Experienced & highly qualified team
- State-of-the-art equipment
- High performance culture
- Robust, behavior based QHSE management program
- Continuous improvement program
- Innovative technology development
- Technical solutions for today's complex wells
